Brian Carreon-SISD Board Application 2017

Why do you want to serve as a member of the SISD Board of Trustees?

Although not a native, I have been a proud member of the Shallowater community for the past 5 years. I am a parent of 3 proud Fillies and you know where to find me on Friday nights in the fall. I consider it an honor to have served on the board for the past 3 years. I have seen teachers, sponsors, coaches, and students work long hours on both in school and extra-curricular activities. I would like the opportunity to continue to serve this hard working community as a board member. I pledge to share this work ethic and do whatever necessary to ensure that this district continues to be a leader in education on the South Plains.

What goals would you like to see accomplished in SISD over the next two years?

Recent federal and state education appointments will certainly provide challenges to all public schools. School finance and a new school rating system will require innovative methods for schools to succeed. However, the recipe for a successful public school system still includes; great students, parents, teachers and a supportive community. Shallowater has the finest of all of these ingredients. No governmental regulation can strip our community of these commodities. Athletics, academics, our ag program, band, UIL, etc. we produce winners. My hope would be that we continue to produce these victories. We need to continue to provide our children with the tools necessary for success after high school. Specific goals that I would like to see implemented are more ACT/SAT prep work with our high school students. I would also like to see us offer as much vocational training as financially possible. I also would encourage our elementary, intermediate and middle schools to continue to offer challenging curricula for our younger students. I would like for SISD to continue to support all of our student activities. Many schools of our size excel in one area, we excel (period). All of these wishes require funding, I hope to support our administration in finding ways to finance our needs.

What skills, knowledge, experience, etc can you offer to the district? I have had the privilege of serving on the SISD board of trustees for the past 3 years. Through that time, I have gained invaluable knowledge and experience about the 'school business'. I could serve 30 more and still have a lot to learn. However, I think that many of the challenges facing our public schools are closely related to those in my medical profession. Governmental regulations, finance, quality concerns, etc. All the while, the goal is the same: to provide a great service to the public. Many of you know my history. I am a native of the wonderful rural community of Rotan, Texas. I attended a great public school and education changed my life. I am passionate about providing that same opportunity to ALL children. There is nothing greater than helping a kid succeed. I think my past allows me to understand the importance of an education. I pledge to work for all of our kids and I hope to help SISD to continue to produce successful men and women.
